**About ReportNRS:**  
This module is populated with data from your MAEM Intake file. During the automated import, only StudentID and StatisticalID are actually imported – all other required values are "Looked up." This look-up action effectively breaks all links (relationships) to MAEMIS files, allowing the Reporter to stand alone.  
To update your Reporter data, go to Menu: Reports and click the NRS Reporter button. This will delete all records and re-import.
